Report on the Benasque session on Quantum Information

The Benasque Center for Science has organized a session on Quantum Information partially financed by the **Quiprocone**. Here follows the report on the scientific activities that took place during the session and the final budget.

Title: QUANTUM INFORMATION

Dates: 22nd of June to 11th July 2003

Place: Centro de Ciencias de Benasque, Benasque, Spain.

Coordinators: Prof. Ignacio Cirac. Max Planck Institute, Munich, Germany
Prof. Artur Ekert. Cambridge University, United Kingdom.

Participants: The number of participants in the meeting was 86, coming from institutions of 20 different countries. The names of the participants and the institutions are given below.

Activities: The session was organized around a reduced number of talks and discussion groups. All scientific activity, including titles of talks and participants, can be found at the web page: <http://benasque.ecm.ub.es/main/sessions.htm#2003> as well as in the below.

Cost: The total cost of the meeting has been:

Support for 2 Coordinators	3.500 €
Support for 3 Organizers	3.900 €
Support to 86 participants	12.000 €
Secretary	2.800 €
System manager	1.800 €
Bus Barcelona-Benasque-Barcelona	1.200 €
Computers	1.300 €
General expenses	2.000 €
<hr/>	
Total	28.500 €

Quiprocone contribution: 19000 €

2003 Quantum Information Talks

Monday, June 23

- **General Meeting**
11h, Casa de la Cultura
-

Tuesday, June 24

- Hans BRIEGEL
Graph states and their applications
12:30, Seminar Room (School)
-

Wednesday, June 25

- Guifré VIDAL
**Entanglement, quantum critical phenomena
and efficient simulation of quantum dynamics**
12:30, Seminar Room (School)
-

Thursday, June 26

- Mary Beth RUSKAI
If not Schmidt, then who? (15 minutes of remarks)
followed by
Wolfgang DÜR
**Stability of macroscopic entanglement
under decoherence**
18:30, Seminar Room (School)
-

Friday, June 27

- Igor VOLOVICH
**Spatial correlations of entangled states
and EPR-Bell experiments**
(Quantum information in space and time)
12:30, Seminar Room (School)
 - Masato KOASHI
**Unconditional security
of B92 quantum key distribution**
18:30, Seminar Room (School)
-

Monday, June 30

- Juan Pablo PAZ
**How to measure expectation values
of arbitrary operators**
12:30, Seminar Room (School)
-

Tuesday, July 1

- Otfried GÜHNE
Characterizing entanglement

via uncertainty relations
12:30, Seminar Room (School)

- Viv KENDON
Quantum walks on general graphs
18:30, Seminar Room (School)
-

Wednesday, July 2

- Jonathan OPPENHEIM
**Local/Non-local complementarity,
phase transitions and information space**
12:30, Seminar Room (School)
 - Giacomo Mauro D'ARIANO
Universal observables
18:30, Seminar Room (School)
-

Thursday, July 3

- David DiVINCENZO
**Will quantum information processing
ever really happen?**
12:30, Seminar Room (School)
-

Friday, July 4

- Howard BARNUM
Generalized entanglement
12:30, Seminar Room (School)
-

Monday, July 7

- Discussion group: **Spin chains and beyond**
Chair: Guifré VIDAL
17:00, Seminar Room (School)
-

Tuesday, July 8

- Mary Beth RUSKAI
Equivalence of additivity questions
12:30, Seminar Room (School)
 - Robert RAUSSENDORF
Quantum algorithms and graphs
18:30, Seminar Room (School)
-

Wednesday, July 9

- Debbie LEUNG
On state randomization and its applications
12:30, Seminar Room (School)
-

Thursday, July 10

- Masanao OZAWA
**Uncertainty relations
and the limits on quantum computation**
12:30, Seminar Room (School)
- Paweł HORODECKI
Hashing inequalities and their consequences
13:00, Seminar Room (School)
